

TOM JOHNSON INVESTMENT MANAGEMENT, LLC

Firm Overview

Tom Johnson Investment Management, LLC was founded in 1983 and is based in Oklahoma City, Oklahoma. TJIM's investment team averages over 20 years of experience. Five of TJIM's six investment committee members are CFA charterholders who collectively hold three MBA's, one Financial Risk Manager (FRM) designation and one CFP® Professional. TJIM's team draws on the diverse knowledge and experience of each underlying member to provide the best investment decisions for client portfolios. TJIM manages all accounts as separate accounts with individual securities.

TJIM Core Equity Process

TJIM's Core Equity approach adheres to the time-tested and market-weathered principles of diversification and valuation standards with a goal of providing superior risk-adjusted returns over a market cycle. TJIM's focus is on purchasing equity securities that have valuations lower than their peer group in industries that provide the best opportunity in the foreseeable future. Under normal circumstances, portfolios are managed with the following guidelines:

Diversification

- 5% max position size
- Own at least 8 of 11 sectors
- Max sector allocation of 2x the S&P or 10%, whichever is larger

Security Selection

- Primarily large /mid cap companies
- Rigorous fundamental analysis
- Tactical macro-economic opportunities

Valuation

- Aggregate PE less than the market
- Low price-to-cash flow
- Low price-to-book
- Sum-of-parts analysis

Risk Management

- Favorable up/down capture
- Unsystematic risk review
- Historically lower standard deviation than the S&P 500

Consistency

TJIM's primary goal is to deliver consistent, high-quality equity exposure that does well across a broad range of environments. This commitment to consistency is demonstrated by TJIM's positive equity performance in 32 of the last 40 years, and outperformance in 5 of the 7 down years. TJIM has achieved a long-term annualized return of over 10% for over 30 years.

TJIM Philosophy

TJIM has a conservative philosophy for investing client assets. TJIM believes that attractive risk-adjusted performance is best achieved by building a prudent, well-diversified, high-quality portfolio that addresses capital preservation and risk. TJIM's over-riding goal is to provide good returns in up markets while protecting wealth when down markets inevitably occur, which should lead to outperformance over a full market cycle.

Performance Calculations

Valuations and returns reflect the reinvestment of dividend and interest income and are computed and stated in U.S. dollars. Performance figures are presented gross of management fees and custodial fees but net of all trading expenses. Net-of-fees returns are calculated using actual management fees that were paid.

TJIM's standard fee schedule is 1% on the first \$1,000,000, 0.75% on the next \$4,000,000, 0.60% on the next \$5,000,000, 0.50% on the next \$15,000,000, 0.45% of the next \$25,000,000, 0.40% of the next \$50,000,000, over \$100,000,000 is quoted upon request. Fees may be negotiated depending upon a variety of variables.

Composite policy requires the temporary removal of any portfolio incurring a client initiated significant cash inflow or outflow of 30% or greater of portfolio assets. The temporary removal of such an account occurs at the beginning of the month in which the significant cash flow occurs and the account re-enters the composite at the beginning of the month after the cash flow or the beginning of the month after the account has achieved representativeness to the style portfolio. Prior to 01/01/2020 accounts were removed and re-entered the composite on a quarterly basis.

Internal dispersion is calculated using the asset-weighted standard deviation of the annual gross-of-fees returns of those portfolios that were included in the composite for the entire year.

The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. It is calculated based on the 36 monthly gross-of-fees returns of the composite and the benchmark.
